

INSTALLATION

- * Your soft window fashions may have a few wrinkles because of the shipping and handling of the product. **Do not** be overly concerned. Your installer will "dress out" the majority and the few remaining will hang out in just a few days.

CARE AND CLEANING

- * To maintain the beauty of that fresh new appearance, vacuum your custom crafted home fashion products every 3 to 6 months.
- * **NEVER WASH** your Custom Soft Fashions by Lafayette. **(The only possible exception might be rod pocket sheers. Please check the care label sewn inside the top hem of your draperies before washing.)**
- * Dry cleaning and/or washing can "break down" the product and should be avoided. Of course, accidents happen and things do get soiled. When this happens, consult with a professional dry cleaning company specializing in drapery care.
